Inp	Output		
A	В	X	
0	0	0	
0	1	1	
1	0	1	
1	1	0	

## xor tablosu

<b>X1</b>	X2	Bains	W1	W2	Wbains	Net	Y	t
0	0	1	0.1	0.2	-0.2	-0.2	0	0
0	1	1	0.1	0.2	-0.2	0	0	1
1	0	1	0.1	1.2	0.8	0.9	1	1
1	1	1	0.1	1.2	0.8	2.1	1	0

Bains 1 olarak aldik

İlk w1 >> 0.1

İlk w2 >> 0.2

ilk wbains >> -0.2

Net >> w1\*x1 +w2\*x2 +bains \*wbains

Burada varsayalim thershold =0.1 > net < thershold

Y >> net > 0.1 ise y = 1, net < 0.1 ise y = 0

Error > t-y

İlk satir icin hata e = 0 olduğu icin w1 w2 ve wbains sonraki satira ekleriz değistirmeden

İkinci satir icin e = 1-0 = 1 olduğu icin w2 w2 ve wbains hesaplariz sonraki satir icin

Simdi w icin guneleme yapariz

Yeni w = eski w + (t-y)\*x

Yeni w1 = 0.1 + (1-0)\*0>>> yeni w1 = 0.1

Deger w ler icin ayni islem yapariz

Simdi ikinci ve dordunuc satirda hata verdigi icin bir tablo daha yapariz

Ve w lar ise eski tablo son satirindan alariz yeni tablo ilk satirina

<b>X1</b>	X2	Bains	W1	W2	Wbains	Net	Y	t
0	0	1	0.1	1.2	0.8	8.0	1	0
0	1	1	0.1	1.2	-0.2	1	1	1
1	0	1	0.1	1.2	-0.2	-0.1	0	1
1	1	1	1.1	1.2	0.8	3.1	1	0

Tekrar ayni islemler

Yine 1,3 ve 4 satirda hata var yine bir tablu yapariz

<b>X1</b>	X2	Bains	W1	W2	Wbains	Net	Y	t
0	0	1	1.1	1.2	0.8	0.8	1	0
0	1	1	1.1	1.2	-0.2	1	1	1
1	0	1	1.1	1.2	-0.2	0.9	1	1
1	1	1	1.1	1.2	-0.2	2.1	1	0

Yine 1 ve 4 satirda hata var yine bir tablu yapariz

<b>X1</b>	X2	Bains	W1	W2	Wbains	Net	Y	t
0	0	1	1.1	1.2	-0.2	-0.2	0	0
0	1	1	1.1	1.2	-0.2	1	1	1
1	0	1	1.1	1.2	-0.2	0.9	1	1
1	1	1	1.1	1.2	-0.2	2.1	1	0

Yine 4 satirda hata var yine bir tablu yapariz

<b>X1</b>	X2	Bains	W1	W2	Wbains	Net	Y	t
0	0	1	1.1	1.2	-0.2	-0.2	0	0
0	1	1	11	1.2	-0.2	1	1	1
1	0	1	1.1	1.2	-0.2	0.9	1	1
1	1	1	1.1	1.2	-0.2	2.1	1	0
